Voice&climate controls

Home is where the comfort is , the real comfort lies in living smart & simple

A smart home is a house which is equipped with connected devices that can be programmed and controlled remotely via a smartphone or computer. For example, a smart home enables remote control of lighting, temperature, multi-media, security, window and doors, and many other functions.

Safety that Keeps your Mind Clear

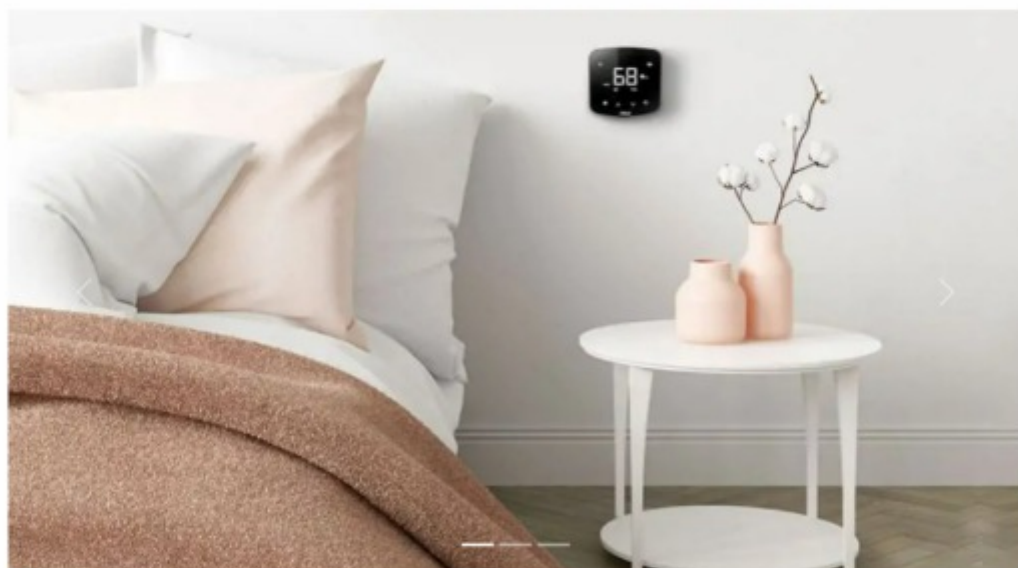

Your home is the place where you feel secure, you and your family deserves the feeling of security even if you are not at home. The Smart Home from iHomeFuture keeps an eye on itself, it keeps monitoring undesired motions or opened windows and alerts you instantly if a threat detected. Thanks to the integration of Zwave and FIBARO systems with surveillance system, our Smart Home can also send you pictures from the camera in order to keep a record of what is going on.

You Hold the Key in Your Mobile

With the integration of smart locks and smart intercoms, the Smart Home from iHomeFuture is an advanced vault. The intercom will alert you about people on your doorsteps even if you are far away, you can talk and watch them as well, you can also allow them access by opening the integrated smart lock.iHomeFuture Smart Home uses the most .
